What's New in Version in 2.1.0

The 2.1.0 release of the NeedToMeet Outlook Add-in resolves several issues discovered since the release of the 2.0.1 version and adds several new features.

Release Notes 2.1.0

- The Cancel option has been added to the Propose New Time action. (2019)

- A display issue with the fly-out when DPI was set to 200% has been resolved. (2268)

- An issue where permission requests to republished calendars did not appear in the alerts has been resolved. (5848)

- Mark as Read and Mark as Unread options have been added to Alerts. (6580)

- NeedToMeet fly-outs are now collapsible. (6581)

- A new About NeedToMeet option has been added to the drop-down menu to allow easy access to NeedToMeet version information. (11291)

- Users will now receive an alert when a new version is available. (13130)

- An issue where an error occurred when creating a new poll using the Timeline has been resolved. (13915)

- An issue where attendees re-added to the Free/Busy grid did not appear has been resolved. (13929)

- An issue where adding timeslots to a new poll first resulted in slow performance has been resolved. (14019)

- An issue where NeedToMeet was holding outbound mail in the Outbox has been resolved. (14053)
